# Justin L. Ripley

DAMTP, University of Cambridge · Wilberforce Road, Cambridge CB3 0WA, UK

lloydripley@gmail.com · https://jlripley314.github.io/ · (619)-851-1226

## Academic Employment

**Research Associate**, DAMTP, University of Cambridge **October 2020-present**

**Research and Teaching Assistant**, Princeton University **September 2014-July 2020**

## Education

**PhD, Physics**, Princeton University **September 2014-July 2020**

Advisor: Frans Pretorius

**B.A., Physics**, Columbia University **September 2010-May 2014**

Minor in Mathematics

Departmental honors in Physics, *summa cum laude*, Phi Beta Kappa

## Awards/Grants

**Hartle award for best talk by a student**, ISGRG **December 2019**

Awarded for GR 22/Amaldi 13 conference

**Erwin H. Leiwant Scholarship**, Columbia University **September 2013-May 2014**

**John Jay Scholar**, Columbia University **September 2010-May 2014**

## Computational Experience

I have programming experience with C/C++, Fortran (77/90), Python, Mathematica. My Github account: JLRipley314, list some of the computational projects I have worked on/am working on.

## Professional Activities

**Seminars**

Friday GR seminar,DAMTP, University of Cambridge **October 2020-present**

**Referee**

Physical Review D, Physical Review Letters **April 2020-present**

**Committees**

Climate and Inclusion Committee, Department of Physics, Princeton University **September 2019-May 2020**

## Teaching

**Assistant Instructor, Princeton University**

| | |
|---|---|
| EGR/PHY 191, An integrated introduction to engineering, math, physics | **Fall 2019** |
| PHY 103/105, General Physics I Lab | **Fall 2018** |
| PHY 304, Advanced Electromagnetism | **Spring 2018** |
| AST 203, The Universe | **Spring 2017,2018** |
| PHY 523, General Relativity | **Fall 2017** |
| AST 204, Topics in Modern Astronomy | **Spring 2016** |
| PHY 301, Thermal Physics | **Fall 2015, Spring 2016** |

**Teaching Assistant, Columbia University**
Math V2000, Introduction to higher mathematics **Spring 2014**

## Outreach

**Princeton Citizen Scientists**
The Princeton Citizen Scientists (PCS) is a graduate student led group at Princeton University that is dedicated to science policy and outreach at the local, state, and federal level.
President **June 2018–July 2019**
Co-organizer for science advocacy trip to Washington, D.C (article) **December 2018**
Co-organizer for science "teach-in" event at Princeton Public Library (article) **October 2017**

**Open Labs**
Open Labs is a graduate student group at Princeton University that organizes "science cafes" where local high and middle school students hear talks given by graduate students about their research.
Treasurer and presenter **May 2018–February 2019**

**Department of Physics, Princeton University**
I participated in several science outreach events organized through the Department of Physics at Princeton University throughout my time as a graduate student. Events where I helped plan/organize some of programming are listed below.
Trenton science summer camp (helped plan and run several lessons over 2 weeks) **July 2018**

**Interviews on "These Vibes are Too Cosmic"**
These Vibes are Too Cosmic is a radio program run through Princeton University.
Interview on exotic compact objects **January 2019**
Interview on antigravity **March 2016**

## Invited Talks/Seminars

6. University of Cambridge, Cambridge, UK (virtual) **November 2020**
*Computing the second order gravitational perturbation of Kerr black holes*

5. Johns Hopkins University, Baltimore, MD (virtual) **November 2020**
*Numerical computation of second order vacuum perturbations of Kerr black holes*

4. Princeton University, Princeton, NJ (virtual) **October 2020**
*Classical modifications to Einstein's General Relativity around black holes*

3. Perimeter Institute, Waterloo, ON (virtual) **April 2020**
*Exploring the nonlinear dynamics of Einstein dilaton Gauss-Bonnet gravity*

2. University of Illinois, Urbana-Champaign, IL **January 2020**
*Testing General Relativity and the nonlinear dynamics of modified gravity theories*

1. Black Hole Initiative, Harvard University, Cambridge, MA **December 2019**
*Nonlinear dynamics of Horndeski theories in spherical collapse*

## Contributed Talks/Seminars (selected)

5. APS April Meeting, Washington, DC (virtual) **April 2020**
*Second order perturbation of a Kerr black hole*

4. Massachusetts Institute of Technology, Cambridge, MA **December 2019**
*Second order vacuum perturbation of a Kerr black hole*

3. GR 22/Amaldi 13, Valencia, Spain **July 2019**
*Nonlinear dynamics of Horndeski theories in spherical collapse*

2. APS April Meeting, Denver, CO **April 2019**
*Hyperbolicity in gravitational collapse in a modified gravity theory*

1. Numerical Relativity beyond General Relativity, Benasque, Spain **June 2018**
*Gravitational collapse in a modified gravity theory*

## Refereed Publications

Link to all papers, including preprints: InSpire Hep

8. **Justin L. Ripley**, Frans Pretorius *Dynamics of a $\mathbb{Z}_2$ symmetric EdGB gravity in spherical symmetry.* Class. Quant. Grav. 37 (15), 155003. arXiv:2005.05417

7. **Justin L. Ripley**, Frans Pretorius *Scalarized black hole dynamics in Einstein-dilaton-Gauss-Bonnet gravity.* Phys. Rev. D 101 (4), 044015. arXiv:1911.11027

6. **Justin L. Ripley**, *Excision and avoiding the use of boundary conditions in numerical relativity.* Class. Quantum Grav. 36 (23) 237001. arXiv:1908.04234

5. **Justin L. Ripley**, Frans Pretorius, *Gravitational collapse in Einstein dilaton Gauss-Bonnet gravity* Class. Quantum Grav. 36 (13) 134001. arXiv:1903.07543 (Invited to Focus Issue on Numerical Relativity Beyond General Relativity)

4. **Justin L. Ripley**, Frans Pretorius, *Hyperbolicity in Spherical Collapse of a Horndeski Theory.* Phys. Rev. D 99 (8), 084014. arXiv:1902.01468

3. **Justin L. Ripley**, Kent Yagi, *Black hole perturbation under a 2+2 decomposition in the action.* Phys. Rev. D 97 (2), 024009. arXiv:1705.03068
