

# Justin L. Ripley

DAMTP, University of Cambridge · Wilberforce Road, Cambridge CB3 0WA, UK  
lloydripley@gmail.com · <https://jlripley314.github.io/> · Citizenship: U.S.A.

## Academic Employment

---

Research Associate, DAMTP, University of Cambridge	October 2020-present
Research and Teaching Assistant, Princeton University	September 2014-July 2020

## Education

---

PhD, Physics, Princeton University Advisor: Frans Pretorius	September 2014-July 2020
B.A., Physics, Columbia University Minor in Mathematics Departmental honors in Physics, <i>summa cum laude</i> , Phi Beta Kappa	September 2010-May 2014

## Awards/Grants

---

Hartle award, ISGRG (GR 22/Amaldi 13 conference)	December 2019
Erwin H. Leiwant Scholarship, Columbia University	September 2013-May 2014
John Jay Scholar, Columbia University	September 2010-May 2014

## Computational Experience

---

I have programming experience with C/C++, Fortran (77/90), Python, and Mathematica. My Github account: JLRipley314, lists some of the individual computational projects I have worked on. I have also done some work for the GRChombo collaboration, which works on an open-source numerical relativity code written in C++.

## Teaching and Mentorship

---

Assistant Instructor, Princeton University	
EGR/PHY 191, An integrated introduction to engineering, math, physics	Fall 2019
PHY 103/105, General Physics I Lab	Fall 2018
PHY 304, Advanced Electromagnetism	Spring 2018
AST 203, The Universe	Spring 2017, 2018
PHY 523, General Relativity (graduate course)	Fall 2017
AST 204, Topics in Modern Astronomy	Spring 2016
PHY 301, Thermal Physics	Fall 2015, Spring 2016
Teaching Assistant, Columbia University	
Math V2000, Introduction to higher mathematics	Spring 2014
Supervisor for undergraduate summer student projects, University of Cambridge	
Shikhar Kumar, <i>Computing null geodesics in slightly perturbed black hole spacetimes</i>	Summer 2021
Adam Wills (co-supervised), <i>Computing the quasinormal modes of wormholes</i>	Summer 2021

## Professional Activities

---

### University of Cambridge, DAMTP

Friday general relativity seminar co-organizer

October 2020-present

General relativity journal club co-organizer

October 2020-present

### Princeton University Department of Physics

Member on the Climate and Inclusion Committee

September 2019-May 2020

### Referee

Physical Review D, Physical Review Letters

## Outreach

---

### Princeton citizen scientists

The Princeton Citizen Scientists is a graduate student led group at Princeton University that is dedicated to science policy and outreach at the local, state, and federal level.

President

June 2018–July 2019

Co-organizer for science advocacy trip to Washington, D.C. (article)

December 2018

Co-organizer for science and intersectionality workshop (link to schedule)

February 2018

Co-organizer for science “teach-in” event at Princeton public library (article)

October 2017

### Open labs

Open labs is a graduate student group at Princeton University that organizes “science cafes” where local high and middle school students hear talks given by graduate students about their research.

Treasurer and presenter

May 2018–February 2019

### Department of physics, Princeton University

I participated in several science outreach events organized through the department of physics at Princeton University throughout my time as a graduate student. events where I helped plan/organize some of programming are listed below.

Trenton science summer camp (helped plan and run several lessons over 2 weeks)

July 2018

### Interviews on “these vibes are too cosmic”

These vibes are too cosmic is a radio program run through Princeton University.

Interview about exotic compact objects

January 2019

Interview about antigravity

March 2016

## Refereed Publications

---

Link to all papers, including preprints: InSpire Hep
