Justin L. Ripley

Department of Physics, University of Illinois, Urbana-Champaign · 1110 West Green Street, Urbana, IL 61801, USA

ripley[at]illinois[dot]edu · **https://jlripley314.github.io/** · Citizenship: U.S.A.

Academic Employment

Research Associate, Department of Physics, University of Illinois, Urbana-Champaign **August 2022-present**

Research Associate, DAMTP, University of Cambridge **October 2020-June 2022**

Research and Teaching Assistant, Princeton University **September 2014-July 2020**

Education

PhD, Physics, Princeton University **September 2014-July 2020**
    Advisor: Frans Pretorius

BA, Physics, Columbia University **September 2010-May 2014**
    Minor in Mathematics
    Departmental honors in Physics, *summa cum laude*, Phi Beta Kappa

Awards/Grants

Hartle award, ISGRG (GR 22/Amaldi 13 conference) **December 2019**
Erwin H. Leiwant Scholarship, Columbia University **September 2013-May 2014**
John Jay Scholar, Columbia University **September 2010-May 2014**

Teaching and Mentorship

Assistant Instructor, Princeton University
    EGR/PHY 191, An integrated introduction to engineering, math, physics **Fall 2019**
    PHY 103/105, General Physics I Lab **Fall 2018**
    PHY 304, Advanced Electromagnetism **Spring 2018**
    AST 203, The Universe **Spring 2017,2018**
    PHY 523, General Relativity (graduate course) **Fall 2017**
    AST 204, Topics in Modern Astronomy **Spring 2016**
    PHY 301, Thermal Physics **Fall 2015, Spring 2016**

Teaching Assistant, Columbia University
    Math V2000, Introduction to higher mathematics **Spring 2014**

Mentorship of PhD students
    Daniel Caballero (University of Illinois) **2023-present**
    *Abhishek Hegade K. R. (University of Illinois) **2022-present**
    Hengrui Zhu (Princeton University) **2022-present**
    *Alex Pandya (Princeton University) **2021-2022**
    *Tamara Evstafyeva (University of Cambridge) **2021-2022**

    *Led to publication.

Mentorship of undergraduate students
    Shikhar Kumar (University of Cambridge) **Summer 2021**
    Adam Wills (University of Cambridge) **Summer 2021**

Professional Activities

External PhD thesis reader
External thesis reader and committee member for Thanassis Giannakoupoulos (University of Lisbon) **September 2022**

University of Cambridge, DAMTP

Friday general relativity seminar co-organizer	**October 2020-June 2022**
General relativity journal club co-organizer	**October 2020-June 2022**

Princeton University Department of Physics

Member on the Climate and Inclusion Committee	**September 2019-May 2020**

Referee

Physical Review D, Physical Review Letters, Classical and Quantum Gravity

Computational Experience

I have programming experience with C/C++, Fortran (77/90), Julia, Python, and Mathematica. My Github account: JLRipley314, lists some of the individual computational projects I have worked on. I have also done some work for the GRChombo collaboration, which works on an open-source numerical relativity code written in C++.

Outreach

Princeton citizen scientists

The Princeton Citizen Scientists is a graduate student led group at Princeton University that is dedicated to science policy and outreach at the local, state, and federal level.

President	**June 2018–July 2019**
Co-organizer for science advocacy trip to Washington, D.C. (article)	**December 2018**
Co-organizer for science and intersectionality workshop (link to schedule)	**February 2018**
Co-organizer for science "teach-in" event at Princeton public library (article)	**October 2017**

Open labs

Open labs is a graduate student group at Princeton University that organizes "science cafes" where local high and middle school students hear talks given by graduate students about their research.

Treasurer and presenter	**May 2018–February 2019**

Department of physics, Princeton University

I participated in several science outreach events organized through the department of physics at Princeton University throughout my time as a graduate student. events where I helped plan/organize some of programming are listed below.

Trenton science summer camp (helped plan and run several lessons over 2 weeks)	**July 2018**

Interviews on "these vibes are too cosmic"

These vibes are too cosmic is a radio program run through Princeton University.

Interview about exotic compact objects	**January 2019**
Interview about antigravity	**March 2016**

Conferences and Seminars

Invited conference talks/seminars

16. University of Illinois, Urbana-Champaign, Urbana, IL   **September 2022**
    Modeling black hole binaries in modified theories of gravity

15. Black Hole Initiative, Harvard University, Cambridge, MA (online)   **March 2022**
    Numerical Relativity and testing General Relativity with gravitational waves: Parts I&II

14. University of Tübingen, Tübingen, DE (online)   **February 2022**
    Evolution of binary black hole systems in scalar Gauss-Bonnet gravity

13. Albert Einstein Institute, Potsdam, DE (online)   **November 2021**
    Evolution of binary black hole systems in scalar Gauss-Bonnet gravity

12. Sapienza University of Rome, Rome, IT (online) **May 2021**
   Computing the second order gravitational perturbation of Kerr black holes

11. University of Oxford, Oxford, UK (online) **February 2021**
   The classical evolution of binary black hole systems in scalar-tensor theories

10. University of Virginia, Charlottesville, VA (online) **February 2021**
   The classical evolution of binary black hole systems in scalar-tensor theories

9. Kyoto University, Kyoto, JP (online) **February 2021**
   The classical evolution of binary black hole systems in scalar-tensor theories

8. University of Southampton, Southampton, UK (online) **January 2021**
   The classical evolution of binary black hole systems in scalar-tensor theories

7. University of Cambridge, Cambridge, UK (online) **November 2020**
   Computing the second order gravitational perturbation of Kerr black holes

6. Johns Hopkins University, Baltimore, MD (online) **November 2020**
   Numerical computation of second order vacuum perturbations of Kerr black holes

5. Princeton University, Princeton, NJ (online) **October 2020**
   Classical modifications to Einstein's General Relativity around black holes

4. Perimeter Institute, Waterloo, ON (online) **April 2020**
   Exploring the nonlinear dynamics of Einstein dilaton Gauss-Bonnet gravity

3. University of Illinois, Urbana, IL **January 2020**
   Testing General Relativity and the nonlinear dynamics of modified gravity theories

2. Massachusetts Institute of Technology, Cambridge, MA **December 2019**
   Second order vacuum perturbation of a Kerr black hole

1. Black Hole Initiative, Harvard University, Cambridge, MA **December 2019**
   Nonlinear dynamics of Horndeski theories in spherical collapse

Contributed conference talks/seminars

9. GR23 (online) **July 2022**
   Evolution of binary scalar-hairy black holes

8. EPS-HEP2021 Conference (online) **July 2021**
   Modeling black hole binaries in scalar-tensor theories of gravity

7. APS April Meeting, Sacramento, CA (online) **April 2021**
   Application of the modified generalized harmonic formulation to scalar-tensor gravity theories

6. BritGrav21, UCD, Dublin, Ireland (online) **April 2021**
   Computing the second order vacuum perturbation of Kerr black holes

5. XIII Black Holes Workshop, IST, Lisbon, PT (online) **December 2020**
   Computing the second order vacuum perturbation of a Kerr black hole

4. APS April Meeting, Washington, DC (online) **April 2020**
   Second order perturbation of a Kerr black hole

3. GR 22/Amaldi 13, Valencia, Spain **July 2019**
   Nonlinear dynamics of Horndeski theories in spherical collapse

2. APS April Meeting, Denver, CO **April 2019**
   Hyperbolicity in gravitational collapse in a modified gravity theory

1. Numerical Relativity beyond General Relativity, Benasque, Spain **June 2018**
   Gravitational collapse in a modified gravity theory
